

dipit

Dip & Rinse Dye for Floral Materials

- ▶ a dip & rinse floral dye, Dipit colors fresh blossoms by immersing flower heads into the dye then rinsing away excess color
- ▶ beautifully colors silk flowers, dried materials and floral accessories too
- ▶ creates stunning color with a smooth, natural appearance
- ▶ use DIPIT where large quantities of flowers require coloring

available in twelve colors —

Holiday Red • Burgundy • Perfect Pink • Deep Blue
Larkspur Blue • Ice Blue • Teal Blue • Purple • Lavender
Holiday Green • Yellow/Yellow • Orange

— these colors blend beautifully

Experiment or use the mixing guide on the backside, and you'll come up with colors that suit your every need.

DIRECTIONS

1. USE high quality, fully bloomed white or light colored flowers.
2. POUR Dipit into a wide mouth container or bucket for easy dipping.
3. DIP blossoms into dye for approximately 2 seconds.
4. SHAKE excess dye back into container or bucket, it's reusable.
5. RINSE blossoms thoroughly in clear water and shake again over a drain.
6. LET DRY before handling to avoid staining of clothing, etc.

NOTES

- Suggest using latex gloves while dyeing to protect hands from staining.
- For darker shades, re-dip flowers after they have dried.
- For lighter shades, dilute dye with DESIGN MASTER Dipit Thinner.
- Dip dyeing blossoms can be messy. Protect work area and clothing from splatter.
- Available in quart or gallon size.

DISPOSAL

Dipit dyes are not water based and should not be poured down the drain. The disposal method we recommend for leftover dye solution is to absorb it into a material like sawdust, wood chips or newspaper. These may simply be disposed of in their normal trash.

DIPIT Dyes / Color Mixing Guide
